THE DUAL PURPOSE SHELF FILES SOLVE MULTIPLE OFFICE PROBLEMS

No extra dividers or compressors are necessary with RFI's No. 9150 and 9154 shelf units as vertical dividers are built right into the file. In the 9172 shelf unit, you have a positive lock channel and follower block Drop-in unit, an RFI exclusive. In the 9174 shelf unit the four letter bins are removable for processing in other areas than the one where it is installed. Of sturdy, all metal construction, the DUAL PURPOSE shelf is available in both letter and legal size. And they stack, too . . . without any fear of buckling or distortion . . . interlock securely and ingeniously, eliminating Bolts, Nuts, or Screws. A variety of accessories are manufactured for use with both these units, all with a design to help you ease your filing problems.

FOLLOWER BLOCKS —Hem Type—for Letter, Legal and sizes larger than letter	1.25
Hem Type—for sizes smaller than letter	.95
PL Drop-in Channel, Complete with PL Follower Block	1.75
PL Follower Block for Built-in Channel	1.00
PL Drop-in Channel complete with Compressor for File Nos. 30-144, 30-144D, and 30-144DV	1.75
 PARACENTRIC LOCK —must be installed at factory; add to unit price of file	4.00
 BAR LOCKS —Five feet long and under	12.00
Over five feet, maximum 7½ feet	14.00
Base and Cap must be prepared for Bar Lock.	
 BASES —3" high Steel Base to fit any standard depth file	\$ 4.50
Over 3" up to 6"	6.50
8" Leg Base—furnished for File No. 7101DR	17.00
Base with Levelizer	9.50
 DOUBLE HEM DROP-IN TYPE DIVIDERS for All Standard Files:	
Two Compartment	1.25
Three Compartment	1.60
Four Compartment	1.95
 CAPS —3" high Steel Cap to fit any Standard Base File	4.50
¾" Flat Cap to fit any Standard Size File	3.25
1¼" Cap for 7100-7101 — Letter and Legal Sizes	3.50
 HANDLES —90° Drop Handles are standard equipment except on Deluxe Files.	
Rigid Aluminum Handles furnished on request; add to unit price of file, per drawer	1.00
 LABEL HOLDER —Fully enclosed Label Holder is standard. (Holds 3¼" wide card.)	
Aluminum Label Holder, add to unit price of file, per drawer	.75
 COLOR —Olive Green, Gray and Pheasant Tan baked enamel. For other specified listed colors, add 15% on quantities 1-49 — 50 and over, no charge. Contact factory for prices on matching colors.	
LOCKING CLIPS —(Side to Side) standard for all drawer type files	N/C
Back to Back when desired	N/C
Standard Outside Depth is 24". When additional depth is required (30" maximum), add to unit price of file	15%
Where depth less than 24" is required (minimum 15"), add to unit price of file	10%
Standard Drawer Side Height is one-half of inside file height. When full-side drawers (FSD) are required, add to unit price	10%
Add N — Nylon Bearings front and rear	1.30
Add NF — Nylon Bearings front only	.80

GENERAL INFORMATION

HOW TO ORDER . . .

Use File Number and Type of File. Check for extra features on accessory page to complete order.

PRICES, TERMS AND CONDITIONS . . .

All prices are net, f.o.b. factory.

Merchandise is carefully packed for shipment. When transportation agent accepts shipments in good condition, our liability ceases. Therefore all shipments should be carefully inspected for damage or shortage before accepting them. If damage or shortage occurs, refuse to accept shipment until transportation agent endorses the extent of such damage or shortage.

TAXES . . .

This price list does not include any State or local sales tax, or other tax that may be levied upon a sale or purchase of mer-

chandise of any item in this list. Any such tax must be paid by the purchaser and if by law the vendor is chargeable with collection or payment, the amount of such tax will be added to the prices listed herein.

FINISH . . .

R. F. I. Steel Record Files are finished in Olive Green or Gray baked enamel. For specified listed color, add 15% on quantities 1-49 — 50 and over, no charge. Contact factory for prices on matching colors.

SPECIAL SIZES . . .

R. F. I. Steel Files are also made in special sizes to meet your requirements.

NET FILING CAPACITY . . .

Outside depth of all drawers, 24". Inside depth not including follower block is 23 $\frac{3}{8}$ " or $\frac{5}{8}$ " less than outside depth.

RFI PRODUCT INFORMATION

R. F. I. Storage Files are made in four distinct types:

- Type 1—Single Drawer to a Shell.
- Type 2—Two Drawers (Horizontal) to a Shell.
- Type 3—Four Drawers to a Shell.
- Type 4—Compartment File.

All of above types can be equipped with Nylon Bearings. The prefix "N" in a file number signifies Nylon Bearings front and back. The prefix "NF" signifies Nylon Bearings in front only.

Full Nylon is not recommended on any file with inside height less than 6".

Nylon Bearings can be put in "Front Only" on two and four-drawer horizontal files. Nylon Bearings Front ONLY are not recommended on any two-drawer horizontal file over 10 $\frac{1}{2}$ " inside drawer height.

A compartment file may be two or more compartments.

A two-compartment file is a file with one divider running the full length of file; a three-compartment file is a file with two dividers running the full length of the file, etc.

See price list for price of dividers.

If all compartments are to be prepared for follower blocks, the order must carry this information. In a two-compartment file ONLY one compartment is prepared for follower blocks unless otherwise specified.

In a three-compartment file ONLY the two outside compartments are prepared for follower blocks unless otherwise specified.

To prepare all compartments for follower blocks the order must specify double hems on dividers.

Add 50¢ per divider when a double hem is to be added to prepare it for a follower block.

All prices and file numbers are based on inside drawer dimensions.

Always specify inside drawer WIDTH first and inside drawer HEIGHT last. (This is important.) Unless otherwise specified, all files will be 24" Outside Depth.

SPECIAL LENGTH FILE

KEEP ALL ORDERS TO 24" OUTSIDE DEPTH IF POSSIBLE.

Maximum outside file depth is 30". For outside file depth over 24" up to 30", add 15% to the regular price. For files with outside depth less than 24", add 10% to the regular price. Minimum order accepted 10 files—for other than standard depth.

FULL SIDE DRAWER

Unless specified, all drawer sides are $\frac{1}{2}$ the inside drawer height. Nylo Glide full side drawers will be 1 $\frac{1}{4}$ " below back bearing. Files may be purchased with full side drawers. Add 10% to the cost of each file where drawer sides are to be full height and be sure to specify very clearly on the order with suffix "FSD" on the file number. Minimum 10 files.

HOW TO DETERMINE OUTSIDE DIMENSIONS OF ANY FILE FOR SURVEY PURPOSES

1. The OUTSIDE HEIGHT of any *glider* type file is always $\frac{7}{8}$ of an inch higher than the inside height of the drawer.

2. The OUTSIDE HEIGHT of any bearing file is always $\frac{5}{8}$ of an inch higher than the inside height of the drawers.
3. The OUTSIDE WIDTH of any single-drawer file is always $\frac{5}{8}$ of an inch wider than the inside width of the drawer.
4. The OUTSIDE WIDTH of any two-drawer horizontal to a shell file is two times the inside drawer width plus $\frac{7}{8}$ ".
5. It is our practice to maintain the outside width of compartment files the same as an equivalent single-drawer to a shell file. To obtain this result we limit compartment sizes in two-compartment files to sizes ending in any of the four following fractional dimensions: $\frac{3}{16}$ ", $\frac{1}{4}$ ", $\frac{1}{8}$ " or $\frac{1}{16}$ ".

Therefore, the formula for outside width of a two (2) compartment file is as follows:

Two (2) times compartment width plus $\frac{3}{4}$ ".

The inside drawer width of a two (2) compartment file is two (2) times the compartment width plus $\frac{1}{8}$ ".

6. To obtain equivalent width on three (3) compartment files, we must likewise limit the width of each compartment to even quarter inches such as, $\frac{1}{4}$ ", $\frac{1}{2}$ ", $\frac{3}{4}$ " or 1".

7. If a customer wants dividers in files such as letter or legal sizes, the individual compartment dimensions are obtained by the following method.

TWO-COMPARTMENT—inside width minus $\frac{1}{8}$ " divided by two (2) equals the inside width of each compartment.

THREE-COMPARTMENT—inside width minus $\frac{1}{4}$ " divided by three (3) equals the inside width of each compartment.

THIS RULE DOES NOT APPLY TO FILE #3-414-32 THREE-COMPARTMENT TAB CARD FILE. This file is equipped with hemless dividers and will not accommodate compressors.

The following minimum and maximum dimensions cover the range of sizes made by Record Files, Inc. Dimensions given are inside drawer width and height.

SINGLE DRAWER TO A SHELL

Minimum Width 6 $\frac{1}{4}$ "	Minimum Height 3 $\frac{3}{4}$ "	Minimum Length 15"
Maximum Width 16 $\frac{1}{4}$ "	Maximum Height 13 $\frac{3}{4}$ "	Maximum Length 30"

TWO DRAWERS TO A SHELL

Minimum Width 4"	Minimum Height 3 $\frac{3}{4}$ "	Minimum Length 15"
Maximum Width 8"	Maximum Height 13 $\frac{3}{4}$ "	Maximum Length 30"

Drop-in dividers can be installed in any of above mentioned files. Do not quote on special files where prices fall into "NOT RECOMMENDED" group.
